Through our massive buying power, we have negotiated special pricing with most of the largest and best Energy Suppliers that service the Northeast. In order to earn NEP's business, Energy Suppliers must be super competitive relative to their price and product terms. In fact, many Energy Suppliers have stripped away most of their administrative costs that they normally build into their pricing (such as commissions to sales people, customer service costs, and other costs associated with customer acquisition) **which allows NEP to offer pricing below what Energy Suppliers would be willing to offer to you directly.** By working with NEP, you will benefit by having an experienced energy professional that can negotiate the **lowest price and most favorable terms available.**

In addition, we provide your company with meaningful feedback on our experience with the various Energy Suppliers to help you make an informed decision on choosing a Supplier. NEP receives the same level of compensation from every Supplier so that we can remain unbiased and help your company secure the most advantageous energy arrangements and budget for long-term rate stability.
